SUMMARY

Third-year Computer Science student and Frontend Developer skilled in **React.js**, **JavaScript**, and **REST APIs**. Proven experience building responsive SPAs like social platforms and university portals. Seeking a challenging internship to leverage technical expertise in web development.

EDUCATION

Bachelor of Science in Computer Science

Jubail Industrial College • Jubail Industrial City • January 2028 • 3.20/4.00

• **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming (Java & Python), Web Development, Digital Logic Design

PROJECTS

University Student Portal Simulation (Portal)

Jubail Industrial College • [juportal.online/](#) • August 2025 – January 2026

- **Spearheaded** the frontend development of a university service portal using **HTML5**, **CSS3**, and **JavaScript**, leading a team of 3 students.
- **Architected** a client-side data persistence system using **Local Storage** to simulate backend functionality (Login/Course Registration) without a server.
- **Engineered** a fully **responsive layout** using Media Queries, ensuring 100% compatibility across desktop and mobile browsers.
- **Simulated** complex academic workflows including GPA calculation and schedule management using advanced **DOM manipulation** logic.

Cay Cafe Website

Remote • [cay-cafe.vercel.app](#) • March 2026 – March 2026

- **Engineered** a modern, high-performance landing page for a commercial seaside cafe using **React.js** and **TypeScript**, achieving a **90+** Lighthouse performance score.
- **Developed** an intuitive customer booking flow, reducing reservation steps by **30%** and enhancing overall User Experience (UX).
- **Implemented** a fully **responsive layout**, ensuring **100%** compatibility and a seamless browsing experience across **3** main device breakpoints (mobile, tablet, desktop).
- **Deployed** the application utilizing modern web practices on Vercel, optimizing rendering performance and achieving page load times under **1.5 seconds**.

Social Media App

Remote • [socialweb12.netlify.app/](#) • November 2024 – December 2024

- Built a responsive Single Page Application (SPA) simulation using **HTML5**, **CSS**, **Bootstrap**, and **JavaScript**.
- Integrated **5+ RESTful API endpoints** to manage user authentication (Login/Signup) and handle dynamic data fetching with **< 200ms** response time.
- Implemented full CRUD operations allowing users to manage posts and images, achieving **100% data persistence** and error-free transaction handling.
- Designed an interactive UI with Bootstrap modals for seamless user experience and real-time DOM manipulation.

CERTIFICATIONS

Maharat min Google AI Course

Google • January 2025

- Completed a comprehensive training program on **Artificial Intelligence fundamentals**, covering key concepts in **Machine Learning**, AI ethics, and their practical applications in modern software development.

UX/UI Design Fundamentals

Tuwaq Academy (Satr Platform) • January 2025

- Gained foundational knowledge of **User Experience (UX)** and **User Interface (UI)** design principles. Learned to apply **user-centric design concepts** and visual hierarchy to bridge the gap between design and frontend implementation, ensuring more intuitive web applications.

JavaScript 103

Tuwaq Academy (Satr) • January 2025

- Completed **10+ hours** of advanced training on ES6+ syntax and Asynchronous programming.

SKILLS

Technical Skills: HTML, CSS3, JavaScript, React.js, API, Git & GitHub, Front End, Python, Java, Hardware Troubleshooting

Soft Skills: Problem Solving, Continuous Learning, Team Collaboration, Attention To Detail, Time Management

Languages: Arabic Native, Advanced English, Chinese. Beginner Chinese
